FCC Statement

The equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to protect you against harmful interference to radio receivers. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to a radio receiver, you are encouraged to take the following steps to correct the interference: 1) Turn the equipment off. 2) Increase the distance between the equipment and the receiver. 3) Consult the dealer or an experienced radio/television technician for help.

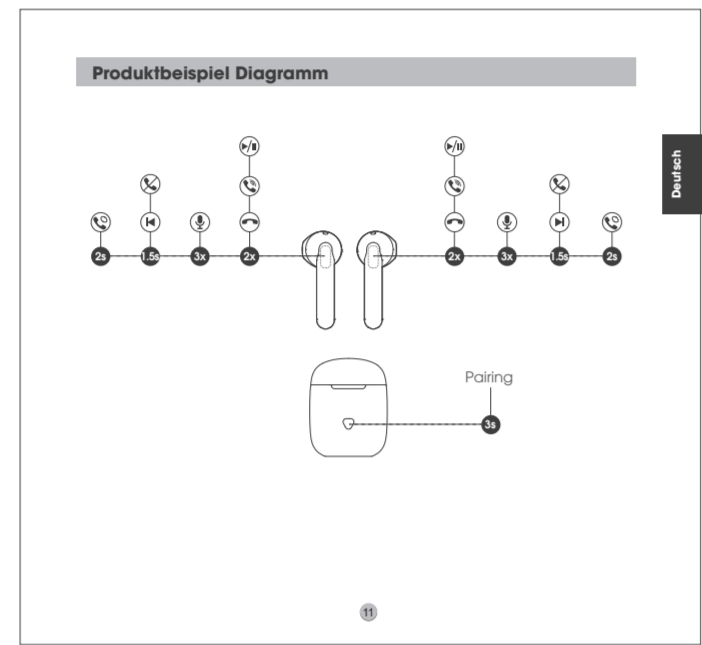

This device may not cause harmful interference, and the device may accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.
